About Momentum Spikes

Founded by Naveen Malkani, Momentum Spikes combines financial market expertise with decades of experience in enterprise technology. The focus is on practical, structured and independent learning to help traders and investors understand markets deeply, develop their own edge and execute with discipline.

> *The goal is not to teach you signals, but to develop the ability to understand markets, think independently and execute with discipline.*
>
> — **Naveen Malkani**
> Founder, Momentum Spikes

Key Strengths & Focus Areas

Technology & Systems

Deep experience in enterprise networking, data centres, cloud and automation.

Technical Analysis

Institutional price action, demand & supply, liquidity engineering and market cycles.

Structured Education

Clear frameworks, step-by-step learning and real market applications.

Independent Perspective

Focus on probability, risk management and developing your own edge.

Mentorship Support

Personal guidance, doubt sessions, case studies and ongoing support.

> *Markets are a long journey.*
> *Knowledge, discipline and the right perspective make it rewarding.*

What You Will Learn

A complete, integrated approach to trading and investing built on five core pillars, designed to give you a deep, practical and structured understanding of financial markets. You will learn how to analyse, plan, execute and adapt across different market conditions with confidence and discipline.

The Five Pillars

THE FOUNDATION OF OUR EDUCATION PROGRAM

01 Advanced Price Action

Read the Language of Price

Learn to understand price behaviour, market structure, trend, trendline, breakouts, consolidations and continuations. Develop the skill to read charts in context and identify high-probability trade locations without relying only on indicators.

Why it is required

Price action is the foundation. It shows what is actually happening in the market – the real result of supply, demand and human behaviour.

02 Demand & Supply

Identify High Probability Zones

Understand institutional demand and supply zones, how they form, how to map them across multiple timeframes and how to use them for precise entries, exits and targets. Learn zone validation, imbalance, mitigation and fresh vs. used zones.

Why it is required

Demand and supply helps you trade in the same direction as institutions, improve risk-reward and avoid low-probability areas.

03 Liquidity Engineering

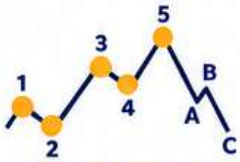

Understand Market Liquidity

Learn how liquidity works in financial markets – stop loss clusters, equal highs/lows, inducements, traps and sweeps. Identify where institutional orders are likely to execute and how liquidity drives price before the real move.

Why it is required

Liquidity explains why price moves the way it does and helps you avoid traps while identifying high-probability setups.

04 Market Cycles with Elliott Wave

See the Bigger Picture

Learn to identify and trade market cycles using Elliott Wave principles. Understand motive and corrective waves, wave degrees, trend alignment, divergences and how cycles repeat across multiple timeframes.

Why it is required

Market cycles give you the bigger picture, help you stay in the right direction and avoid counter-trend traps at major turning points.

05 Wyckoff Principles & Institutional Footprint

Understand Institutional Behaviour

Learn how institutions accumulate, distribute and create market cycles using Wyckoff principles. Identify phases, volume behaviour, effort vs result and institutional footprint across price and time.

Why it is required

Wyckoff helps you understand institutional behaviour, giving you the ability to trade with smart money instead of against it.

How It All Comes Together

Each pillar gives an important piece of the puzzle. When combined, they create a complete framework that helps you understand, analyse and execute with confidence.

Complete Understanding
From price behaviour to institutional activity and market cycles.

Higher Probability Trades
Trade from context, not from guesswork.

Better Risk Management
Identify traps, avoid low-probability areas and protect capital.

Independent Thinking
Develop your own edge and trading style.

Consistent Execution
Apply a structured, repeatable process across markets and timeframes.

"Markets reward those who understand the complete picture, think independently and execute with discipline."

How Our Program Works

A Structured, Sequential and Personalised Learning Journey

Learn at your own pace, get personalised guidance after each chapter and apply your knowledge through practical assignments.

STEP 01

Learn Chapter by Chapter in Sequence

24 Structured Chapters | Self-Paced Learning

The complete course is available in our exclusive Members Access Area, organised into 24 chapters in a predefined sequence. Start with Chapter 1 and progress one chapter at a time.

One Chapter at a Time.
Build a Strong Foundation.

STEP 02

After Each Chapter Book Your 1-on-1 Training Session

One Dedicated Session for Every Chapter

After completing the self-study of each chapter, book your individual 1-on-1 training and doubt-clearing session with the mentor. Discuss your doubts, review concepts, analyse charts and get personalised guidance.

After Each Chapter,
Book Your 1-on-1 Session.
Get Personal Guidance.

STEP 03

Complete Assignment and Chart Practice

Practical Application | Real Market Experience

Following your 1-on-1 session, complete the assignments for that chapter. These assignments help you apply the concepts, analyse real market situations and develop independent analytical skills before moving to the next chapter.

Apply Knowledge.
Complete Assignments and Practice Charts.

> *"Learning requires **patience.** Expertise comes **after learning.**"*

YOUR LEARNING JOURNEY (REPEAT FOR ALL 24 CHAPTERS)

1 LEARN Chapter by Chapter > **2 BOOK** 1-on-1 Session After Each Chapter > **3 COMPLETE** Assignment and Chart Practice

Let's Connect

Have questions about the program? Book a free 1-on-1 session to understand how Momentum Spikes can help you in your trading and investing journey.

PRICE ACTION
Read the market structure with clarity.

DEMAND & SUPPLY
Identify high probability trading zones.

LIQUIDITY ENGINEERING
Understand institutional footprint and liquidity flows.

MARKET CYCLES
Understand trends, corrections and opportunities.

RISK MANAGEMENT
Trade and invest with discipline.
